Using Splunk UBA (eLearning)

05-APR-2026

4 Credit Hours

Using Splunk UBA

This 4-hour course is designed for users who are responsible for leveraging Splunk UBA. The course provides the fundamental knowledge of Splunk UBA, foundational product information, and use cases for Threat Hunters and Incident Response. It covers installation prerequisites, configuration, management, monitoring, and troubleshooting of Splunk forwarders and Splunk Deployment Server components.

Course Topics

- Splunk UBA Overview
- Starting with Splunk UBA
- The Analyst Workflow
- The Hunter Workflow
- Reviewing current User activity
- Investigating and Monitoring Domains

Prerequisite Knowledge

To be successful, students should have a solid understanding of the following courses:

- What is Splunk?
- Intro to Splunk
- Overview of Splunk UBA

Or the following courses:

- Fundamentals 1
- Overview of Splunk UBA
- Fundamentals 2 (recommended)

Students should also understand the following courses:

- Using Splunk Enterprise Security (recommended)

Course Format

eLearning
